

Premier 48 M Plus Repeater Panel

(PMP48-REP, PMP48-REP/M)

The Premier 48 M Plus repeater is available in 2 versions - standard & multiple.

The standard repeater offers display & control functions, however is limited to one per system.

The second version allows multiple repeaters on the same system however they do not have any control functions (i.e. they cannot be used to silence or reset the system).

A single repeater can be powered from the panels' auxiliary 24V supply. If more than one repeater is to be used, a separate 24V is required.

Model	PMP48-REP	PMP48-REP/M
Part No.	37-037	37-038
Functions	Display & control	Control only
Supply Voltage	20-30V DC	
Maximum Quantity Per System	1	5
Connections	Serial Repeater A Serial Repeater A +24V DC 0V	
Operating Temperature	0°C to 50°C	
Enclosure Size	480 x 330 x 60mm	
Weight	4.8kg
