

Zeta Addressable Securetone 2 Addressable Flasher (ZASF/RI)

The Zeta addressable Securetone 2 flasher has a low profile design which makes it ideal for locations where flashers are required to be unobtrusive.

It is designed to work with the complete range of Zeta addressable control panels.

It also includes a short circuit isolator which minimises the number of devices which would be inoperative in the case of a short circuit on the loop.

Features

- ✓ Complies fully to EN-54 part 3
- ✓ Includes short circuit isolator
- ✓ Low current consumption
- ✓ Loop isolation option
- ✓ Compatible with all Zeta addressable panels
- ✓ DIP switch address setting

Model	ZASF/RI
Part No.	42-530
Maximum Flashers Per Loop	64
Short Circuit Isolator	Yes
Operating Voltage	17-30V DC
Quiescent Current	0.9 mA
Alarm Current	2.5 mA
Maximum Cable Size	2.5mm ²
Operating Temperature	0°C to 40°C
Maximum Humidity	95% RH Non Condensing
IP Protection Rating	IP43
Material	Red ABS Plastic
Size, Diameter x Height	100mm x 37.5mm
Weight	120g
