

Supervised Remote Microphone (ZT-DVS-RM/B)

Description

The ZT-DVS-RM/B is a remote microphone for use with the ZT-MNS-100BAS voice evacuation panel. Only one remote microphone can be used with each audio panel. (note the ZT-MNS-100BAS panel includes a microphone).

The ZT-DVS-RM/B microphone can be located up to 100ft from the main panel and to provide paging and live 'override' of the pre-recorded message and alert tones.

The microphone and interconnecting wires are supervised. A fault will cause the control boards system LED, and remote Mic Fault LED to light.

The surface mounting steel enclosure provides a key locking hinged cover. The device can be placed in an entry way for access by authorised personnel only.

Technical Specification

Input	Volt / Amp: 24 VDC / 0.06A
Output	Compatible with ZT-MNS-100BAS
Wiring	Up to 30 metres (100 feet) 18-22 AWG, 4-conductor cable Shielding is recommended if cable is run in same conduit with SLC
Enclosure	210mm H x 184mm W x 89mm D
Colour	Red

Installation
