

Disabled Toilet Alarm System

(DPTA-KIT1)

This Disabled Persons Toilet Alarm Systems is available as a single zone kit which can be expanded up to 4 zones (where one zone is typically used for each toilet). It has been designed for use in disabled persons dwellings to meet the requirements of BS8300.

The system consists of a 4 zone control panel (DPTA-CP) which is (for each zone) connected to a Pull Cord (DPTA-PC), Remote Reset (DPTA-RR) and Remote Indicator (DPTA-RI).

Typical Installation Diagram

The following illustration shows how the Control Panel and field devices are connected in a typical installation for a single toilet.

Features

- ✓ Simple 3 wire operation for all field devices
- ✓ Control Panel supporting up to 4 zones
- ✓ Simple maintenance and fault diagnosis
- ✓ On board buzzer in both Control Panel & Remote Indicator
- ✓ Zone LED indication on Control Panel
- ✓ Full range of field devices available (i.e. Pull Cord, Remote Reset & Remote Indicator)
